SUPPLEMENTARY INFORMATION: U.S. Customs Commissioner George J. Weise has announced that Phase 1 of the Automated Export System (AES) will be implemented at the ports of Baltimore; Norfolk; Houston; Charleston, South Carolina and Long Beach, California. Implementation is scheduled for July 1995.

AES is a joint venture between Customs and the Bureau of Census. The system is designed to electronically gather export-related information from both exporters and carriers prior to actual exportation.

A major goal of AES is to improve the accuracy of export trade statistics, which are used as a primary economic indicator. Eventually, AES will replace numerous paper and electronic mechanisms for filing Shipper's Export Declarations (SED's). AES will also enhance collection of the Harbor Maintenance Fee on exports, which is expected to return \$60 to \$80 million to the U.S. Treasury annually.

Customs, Treasury's lead agency for international trade issues, started AES development in May 1994. The AES team has been working closely with a Trade Resource Group comprised of members from export-related industries.

In this document, Customs is announcing the following public meetings on AES:
